## 32-8209: Recombinant Human PDCD5/TFAR19 (N-6His)

## Gene: PDCD5

Gene ID: 9141
Uniprot ID : 014737

## Description

Source: E. coli.
MW :16.4kD.
Recombinant Human Programmed Cell Death Protein 5 is produced by our E.coli expression system and the target gene encoding Met1-Tyr125 is expressed with a 6 His tag at the N-terminus. Programmed Cell Death Protein 5 (PDCD5) is a member of the PDCD5 family. PDCD5 is expressed in tumor cells during apoptosis, independent of apoptosis-inducing stimuli. This protein may function in the process of apoptosis. PDCD5 is upregulated during apoptosis where it translocates rapidly from the cytoplasm to the nucleus. PDCD5 may play an important regulator of K (lysine) acetyltransferase 5 (a protein involved in transcription, DNA damage response and cell cycle control) by inhibiting its proteasome-dependent degradation. PDCD5 is an important novel protein that regulates both apoptotic and non-apoptotic programmed cell death.

## Product Info

## Amount :

Content :

## Storage condition :

## $10 \mu \mathrm{~g} / 50 \mu \mathrm{~g}$

Lyophilized from a $0.2 \mu \mathrm{~m}$ filtered solution of $20 \mathrm{mM} \mathrm{PB}, 150 \mathrm{mM} \mathrm{NaCl}, \mathrm{pH} 7.4$.
Lyophilized protein should be stored at $-20^{\circ} \mathrm{C}$, though stable at room temperature for 3 weeks. Reconstituted protein solution can be stored at $4-7^{\circ} \mathrm{C}$ for 2-7 days. Aliquots of reconstituted samples are stable at $-20^{\circ} \mathrm{C}$ for 3 months.

## Amino Acid : <br> MGSSHHHHHHSSGLVPRGSHMADEELEALRRQRLAELQAKHGDPGDAAQQEAKHREAEMRNSILAQVLDQS ARARLSNLALVKPEKTKAVENYLIQMARYGQLSEKVSEQGLIEILKKVSQQTEKTTTVKFNRRKVMDSDEDDDY

## Application Note

Always centrifuge tubes before opening. Do not mix by vortex or pipetting. It is not recommended to reconstitute to a concentration less than $100 \tilde{A} \square A ̂ \mu \mathrm{~g} / \mathrm{ml}$. Dissolve the lyophilized protein in ddH2O. Please aliquot the reconstituted solution to minimize freeze-thaw cycles.
Endotoxin : Less than 0.1 ng/Ã $\square A ̂ \mu \mathrm{~g}$ ( 1 IEU/Ã $\square A ̂ \mu \mathrm{~g}$ ) as determined by LAL test.
