## 32-8269: Recombinant Human Unique Cartilage Matrix-Associated Protein/UCMA

Gene ID: UCMA
Gene ID: 221044
Uniprot ID: Q8WVF2

## **Description**

Source: E. coli. MW:9.76kD.

Recombinant Human Unique cartilage matrix-associated protein is produced by our E.coli expression system and the target gene encoding Ser65-Thr138 is expressed. C10orf49 is a secreted protein which encoded by the UCMA gene. It is a member of the UCMA family. C10orf49 is predominantly expressed in resting chondrocytes. It may be involved in the negative control of osteogenic differentiation of osteochondrogenic precursor cells in peripheral zones of fetal cartilage and at the cartilage-bone interface.
