

32-8271: Recombinant Human Arginase-1/ARG1 (C-6His)

Gene : ARG1
Gene ID : 383
Uniprot ID : P05089

Description

Source: E. coli.
MW :35.8kD.

Recombinant Human Arginase-1 is produced by our E.coli expression system and the target gene encoding Met1-lys322 is expressed with a 6His tag at the C-terminus. ARG1 is a member of the ureohydrolase family of enzymes. ARG1 can catalyze the hydrolysis of arginine to ornithine and urea. In the urea cycle, ARG1 catalyzes the fifth and final step, a series of biochemical reactions in mammals during which the body disposes of harmful ammonia. ARG1 is a cytosolic enzyme and expressed widely in the liver as part of the urea cycle. Inherited deficiency of this ARG1 causes argininemia, which is an autosomal recessive disorder characterized by hyperammonemia.
