

32-8276: Recombinant Human LIM and Cysteine-Rich Domains Protein 1/LMCD1/Dyxin (N, C-6His)(Discontinued)

Gene : LMCD1
Gene ID : 29995
Uniprot ID : Q9NZU5

Description

Source: E. coli.

MW :44kD.

Recombinant Human LMCD1 is produced by our E.coli expression system and the target gene encoding Met1-Ser365 is expressed with a 6His tag at the N-terminus, 6His tag at the C-terminus. LMCD1 is transcriptional cofactor which contains a cysteine-rich domain in the N-terminal region and 2 LIM domains in the C-terminal region. It also has several potential phosphorylation and N-myristoylation sites and a single potential N-glycosylation site. LMCD1 is expressed in many tissues with highest abundance in skeletal muscle. LMCD1 restricts GATA6 function by inhibiting DNA-binding, resulting in repression of GATA6 transcriptional activation of downstream target genes. It plays a critical role in the development of cardiac hypertrophy via activation of calcineurin/nuclear factor of activated T-cells signaling pathway.

Product Info

Amount : 10 µg / 50 µg
Content : Supplied as a 0.2 µm filtered solution of 20mM PB,150mM NaCl,pH7.4.
Storage condition : Store at -20°C, stable for 6 months after receipt. Please minimize freeze-thaw cycles.
Amino Acid : MGSSHHHHHSSGLVPRGSHMAKVAKDLNPGVKKMSLQQLQSARGVACLGCKGTCSGFEPHSWRKICKSCK
