

## 32-8280: Recombinant Human Peptidase D/PEPD(Discontinued)

**Gene :** PEPD  
**Gene ID :** 5184  
**Uniprot ID :** P12955

### Description

Source: E. coli.  
MW :54.5kD.

Recombinant Human Peptidase D is produced by our E.coli expression system and the target gene encoding Ala2-Lys493 is expressed. PEPD belongs to the peptidase M24B family of Eukaryotic-type prolidase subfamily. PEPD is a cytosolic dipeptidase that hydrolyzes dipeptides with proline or hydroxyproline at the carboxy terminus. It is important in collagen metabolism because of the high levels of imino acids. Defects in PEPD are a cause of prolidase deficiency which is an autosomal recessive disorder associated with iminodipeptiduria.

### Product Info

**Amount :** 10 µg / 50 µg  
**Content :** Supplied as a 0.2 µm filtered solution of 20mM PB,150mM NaCl,pH7.4.  
**Storage condition :** Store at -20°C, stable for 6 months after receipt. Please minimize freeze-thaw cycles.  
**Amino Acid :** AAATGPSFWLGNLTKVPLALFALNRQLCERLRKNPAVQAGSIVVLQGG EETQRYCTDTGVLFRQESFFHWA
