Gene : acpS
Gene ID : 947037
Uniprot ID : P24224

Description

Source: E. coli.
MW :15.1kD.

Recombinant E.coli 4'-phosphopantetheinyl transferase AcpS is produced by our E.coli expression system and the target gene encoding Ala2-Ser126 is expressed with a 6His tag at the C-terminus. Holo-[acyl-carrier-protein] synthase is an enzyme that belongs to the P-Pant transferase superfamily.AcpS family.It transfers the 4'-phosphopantetheine moiety from coenzyme A to the 'Ser-36' of acyl-carrier-protein.It catalyzes the chemical reaction: CoA-[4'-phosphopantetheine] + apo-acyl carrier protein adenosine 3',5'-bisphosphate + holo-acyl carrier protein. This enzyme participates in pantothenate and coa biosynthesis.
