32-8461: Recombinant Human Microfibril-Associated Glycoprotein 4/MFAP4(C-6His)(Discontinued)

Gene ID: 4239
Uniprot ID: P55083

Description

Source: Human Cells.

MW:27.5kD.

Recombinant Human MFAP4 is produced by our Mammalian expression system and the target gene encoding Val22-Ala255 is expressed with a 6His tag at the C-terminus. Microfibril-associated glycoprotein 4(MFAP4) is a secreted protein and contains 1 fibrinogen C-terminal domain, similarity to a bovine microfibril-associated protein. The protein has binding specificities for both collagen and carbohydrate. It is thought to be an extracellular matrix protein which is involved in calcium-dependent cell adhesion or intercellular interactions. The gene is located within the Smith-Magenis syndrome region.
