## 32-8783: Recombinant Human CD3 e/CD3E (C-Fc)

## Gene: CD3E

Gene ID: 916
Uniprot ID : P07766

## Description

Source: Human Cells.
MW :38.7kD.
Recombinant Human CD3 epsilon is produced by our Mammalian expression system and the target gene encoding Asp23Asp126 is expressed with a Fc tag at the C-terminus. T-Cell Surface Glycoprotein CD3 e Chain (CD3e) is a single-pass type I membrane protein. CD3e contains 1 Ig-like (immunoglobulin-like) domain and 1 ITAM domain. CD3e is a polypeptide encoded by the CD3E gene on chromosome 11 in humans. The T cell receptor-CD3 complex (TCR/CD3 complex) is involved in T-cell development and several intracellular signal-transduction pathways. This complex is critical for T-cell development and function, and represents one of the most complex transmembrane receptors. The T cell receptor-CD3 complex is unique in having ten cytoplasmic immunoreceptor tyrosine-based activation motifs (ITAMs). TCR/CD3 complex plays an important role in coupling antigen recognition to several intracellular signal-transduction pathways.

## Product Info

Amount :

## Content :

## Storage condition :

## Amino Acid :

$10 \mu \mathrm{~g} / 50 \mu \mathrm{~g}$
Lyophilized from a $0.2 \mu \mathrm{~m}$ filtered solution of PBS, pH7.4. Lyophilized protein should be stored at $-20^{\circ} \mathrm{C}$, though stable at room temperature for 3 weeks. Reconstituted protein solution can be stored at $4-7^{\circ} \mathrm{C}$ for $2-7$ days. Aliquots of reconstituted samples are stable at $-20^{\circ} \mathrm{C}$ for 3 months.

## Application Note

Endotoxin : Less than 0.1 ng/Ã $\square A ̂ \mu \mathrm{~g}(1 \mathrm{IEU} / \hat{A} \square A ̂ \mu \mathrm{~g})$ as determined by LAL test.
