32-8856: Recombinant Mouse TRANCE/RANK L/TNFSF11(Discontinued)

Gene ID : 21943 **Uniprot ID :** 035235

Description

Source: E.coli. MW:20.1kD.

Recombinant Mouse TNF ligand superfamily member 11 is produced by our expression system and the target gene encoding Gln137-Asp316 is expressed. Mouse tumor necrosis factor ligand superfamily member 11(Tnfsf11) is a member of the tumor necrosis factor (TNF) cytokine family. Tnfsf11 is widely expressed in cells including T cells and T cell rich organs, such as thymus and lymph nodes. This cytokine can bind to TNFRSF11B/OPG andTNFRSF11A/RANK. Tnfsf11 is involved in a number of fundamental biological processes such as acting as regulator of interactions between T-cells and dendritic cells, the regulation of the T-cell-dependent immune response and enhancing bone-resorption in humoral hypercalcemia of malignancy. It augments the ability of dendritic cells to stimulate naive T-cell proliferation.
