

32-8915: Recombinant Mouse IAP/OA3/CD47 (C-6His)

Gene : Cd47
Gene ID : 16423
Uniprot ID : Q61735

Description

Source: Human Cells.
MW :16.7kD.

Recombinant Mouse Leukocyte surface antigen CD47 is produced by our Mammalian expression system and the target gene encoding Gln19-Pro158 is expressed with a 6His tag at the C-terminus. CD47 is involved in the increase in intracellular calcium concentration that occurs upon cell adhesion to extracellular matrix. The protein is also a receptor for the C-terminal cell-binding domain of thrombospondin, and it may play a role in membrane transport and signal transduction. This protein has broad tissue distribution, and is reduced in expression on Rh erythrocytes.
