

32-8986: Recombinant Human Uteroglobulin/SCGB1A1 (C-6His)

Gene : SCGB1A1

Gene ID : 7356

Uniprot ID : P11684

Description

Source: Human Cells.

MW :8.7kD.

Recombinant Human Uteroglobulin is produced by our Mammalian expression system and the target gene encoding Glu22-Asn91 is expressed with a 6His at the C-terminus. Uteroglobulin is a small, non-glycosylated secreted protein of the secretoglobulin superfamily. It is produced by the non-ciliated, non-mucous secretory cells that predominate in lung bronchioles (Clara cells), and other non-ciliated epithelia that communicate with the external environment. Expression is induced by steroid hormones such as estrogen, and enhanced by the non-steroid hormone prolactin. Human Uteroglobulin cDNA encodes a 21 amino acid (aa) signal sequence and a 70 aa mature protein. The mature protein forms a disulfide-linked head-to-tail homodimer of 16 kDa. This homodimer is thought to form a binding pocket that binds hydrophobic ligands such as phospholipids, progesterone and retinols. Binding of fibronectin to Uteroglobulin in the kidney is thought to protect against nephropathy, while binding of the lipocalin-1 receptor has been reported to suppress cancer cell motility and invasion.

Product Info

Amount : 10 µg / 50 µg

Content : Lyophilized from a 0.2 µm filtered solution of PBS, pH7.4.

Storage condition : Lyophilized protein should be stored at -20°C, though stable at room temperature for 3 weeks. Reconstituted protein solution can be stored at 4-7°C for 2-7 days. Aliquots of reconstituted samples are stable at -20°C for 3 months.

Amino Acid : EICPSFQRVIETLLMDTPSSYEAAAMELFPDQDMREAGAQLKLVDTLPQKPRESIKLMKIAQSSLCNHHHHHH
H

Application Note

Endotoxin : Less than 0.1 ng/µg (1 IEU/µg) as determined by LAL test.
