

32-9001: Recombinant Human Serpin A12/Vaspin (C-10His)

Gene : SERPINA12

Gene ID : 145264

Uniprot ID : Q8IW75

Description

Source: Human Cells.

MW :46.5kD.

Recombinant Human Serpin A12 is produced by our Mammalian expression system and the target gene encoding Leu21-Lys414 is expressed with a 10His tag at the C-terminus. Vaspin (Visceral Adipose-Specific SERPIN) is a newly described adipokine. Vaspin has three beta-sheets, nine α -helices, and one central loop; the structure is part of the set of distinctive features that are descriptive of Serpin family members. Vaspin is also a unique insulin sensitizing adipocytokine in obesity. A recent publication indicates that Vaspin mRNA expression in visceral fat is positively correlated with BMI and percent of body fat. and could be associated with parameters of obesity, insulin resistance, and glucose metabolism. These findings suggest a potential clinical use for Vaspin in ameliorating certain aberrations seen in the obesity metabolic syndrome.

Product Info

Amount : 10 μ g / 50 μ g

Content : Supplied as a 0.2 μ m filtered solution of 20mM Tris, 150mM NaCl, pH7.5.

Storage condition : Store at -20°C, stable for 6 months after receipt. Please minimize freeze-thaw cycles.

Amino Acid : LKPSFSRNYKALSEVQGWKQRMMAAKELARQNMDLGFKLLKKLAFYNPGRNIFLSPLSISTAFSMLCLGAQDST
