

## 45-1034: Rabbit Polyclonal Antibody to Histone H2A(Discontinued)

<b>Clonality :</b>	Polyclonal
<b>Application :</b>	ELISA
<b>Reactivity :</b>	Human
<b>Gene :</b>	HIST2H2AC
<b>Gene ID :</b>	8338
<b>Uniprot ID :</b>	Q16777
<b>Format :</b>	Purified
<b>Alternative Name :</b>	Histone 2A, Histone H2A-GL101, Histone H2A/q, H2AFQ
<b>Isotype :</b>	Rabbit IgG
<b>Immunogen Information :</b>	Synthetic peptide derived from the carboxyl terminal of human histone H2A

### Description

Histone H2A is the core component of the nucleosome. It is involved in nucleosome wrapping and compacting of DNA into chromatin, limiting DNA's accessibility to the cellular machinery. Histones thereby play a central role in transcription regulation, DNA repair, replication, and chromosomal stability. DNA accessibility is regulated via a complex set of post-translational modifications of histones, called histone code, and nucleosome remodeling. Rabbit Anti-Histone H2A Polyclonal Antibody is developed in rabbit using a KLH-coupled synthetic peptide corresponding to the residues near carboxyl terminal of human histone H2A protein (Swiss Prot: Q16777).

### Product Info

<b>Amount :</b>	40 µg
<b>Purification :</b>	Immunoaffinity chromatography
<b>Content :</b>	0.5 mg/ml, lyophilized with PBS, pH 7.4, containing 0.02% sodium azide
<b>Storage condition :</b>	The antibody is stable in lyophilized form if stored at -20°C or below. The reconstituted antibody can be stored for 2-3 weeks at 2-8°C. For long term storage, aliquot and store at -20°C or below. Avoid repeated freezing and thawing cycles.

### Application Note

**ELISA:** 0.05-0.2 µg/ml

**Western blot:** 1-2 µg/ml

Reconstitute the lyophilized powder with deionized water (or equivalent) to an antibody concentration of 0.5 mg/ml.

Figure-1 : Western blot analysis of Histone H2A Antibody at 1 µg/ml on HeLa cell lysate, 1: Histone H2A Antibody, 2: Histone H2A Antibody pre-incubated with immunizing peptide. IRDye 800 Conjugated Goat Anti-Rabbit IgG was used as secondary antibody.
