## 45-1058: Mouse Monoclonal Antibody to GAPDH (Clone: 3B1E9)(Discontinued)

Clone Name: Monoclonal
Clone Name: 3B1E9
Application: ELISA

**Reactivity:** Pig,Human,Bovine,Goat

Gene : GAPDH
Gene ID : 2597
Uniprot ID : P04406
Format : Purified

Alternative Name: Glyceraldehyde-3-phosphate dehydrogenase, Peptidyl-cysteine S-nitrosylase GAPDH

**Isotype:** Mouse IgG2a, κ

Immunogen Information: Human GAPDH protein from erythrocytes

## **Description**

Glyceraldehyde-3-phosphate dehydrogenase (GAPDH) is well known as one of the key enzymes involved in glycolysis. It catalyzes an important energy-yielding step in carbohydrate metabolism, the reversible oxidative phosphorylation of glyceraldehyde-3-phosphate in the presence of inorganic phosphate and nicotinamide adenine dinucleotide (NAD). The enzyme exists as a tetramer of identical chains. Besides its functioning as a glycolytic enzyme in cytoplasm, recent evidence suggest that mammalian GAPDH is also involved in a great number of intracellular proceses such as membrane fusion, microtubule bundling, phosphotransferase activity, nuclear RNA export, DNA replication, and DNA repair. During the last decade a lot of findings appeared concerning the role of GAPDH in different pathologies including prostate cancer progression, programmed neuronal cell death, age-related neuronal diseases, such as Alzheimers and Huntingtons disease. GAPDH Antibody, mAb, Mouse is produced from the hybridoma resulting from fusion of Sp2/0 myeloma and lymphocytes obtained from mouse immunized with human GAPDH protein from erythrocytes.

## **Product Info**

Amount:  $100 \mu g$ 

**Purification:** Protein A chromatography

**Content:** 0.5 mg/ml, lyophilized with PBS, pH 7.4, containing 0.02% sodium azide.

The antibody is stable in lyophilized form if stored at -20°C or below. The reconstituted antibody

**Storage condition :** can be stored for 2-3 weeks at 2-8°C. For long term storage, aliquot and store at -20°C or

below. Avoid repeated freezing and thawing cycles.

## **Application Note**

**ELISA:** 0.05-0.2 μg/ml **Western blot:** 1-2 μg/ml

Reconstitute the lyophilized powder with deionized water (or equivalent) to an antibody concentration of 0.5 mg/ml.
