

## 45-1092: Mouse Monoclonal Antibody to Human VISTA (Clone : VA.F6) (Discontinued)

|                                |  |
|--------------------------------|--|
| <b>Clonality :</b>             | Monoclonal   |
| <b>Clone Name :</b>            | VA.F6  |
| <b>Application :</b>           | ELISA  |
| <b>Gene :</b>                  | VSIR   |
| <b>Gene ID :</b>               | 64115  |
| <b>Uniprot ID :</b>            | Q9H7M9   |
| <b>Format :</b>                | Purified   |
| <b>Alternative Name :</b>      | VSIR/V-set immunoregulatory receptor/B7H5/ GI24/ B7-H5/ PD-1H/ SISP1/ PP2135/ C10orf54/ DD1alphaPDCD1 Homolog/V-Set Domain-Containing Immunoregulatory Receptor/V-Domain Ig Suppressor Of T Cell Activation / Chromosome 10 Open Reading Frame 54/Stress-Induced Secreted Protein-1/Stress Induced Secreted Protein 1/ Platelet Receptor GI24/ Platelet Receptor Gi24 / Death Domain1alpha |
| <b>Isotype :</b>               | Mouse IgG2a,Kappa  |
| <b>Immunogen Information :</b> | Recombinant human VISTA-Fc   |

### Description

VISTA is a negative immune checkpoint regulator that suppresses T-cell activation, and highly expressed on hematopoietic cells and within the tumor microenvironment. By analogy to VISTA and PD-L1 blockade, VISTA blockade may offer an immunotherapeutic strategy for human cancer. Therapeutic antibody against VISTA activates T cell signal and offers a way to promote this blockade. Human VISTA Antibody (VA.F6), mAb, Mouse is produced from a hybridoma resulting from the fusion of SP2/0 myeloma and B-lymphocytes obtained from a mouse immunized with recombinant human VISTA.

### Product Info

|                            |  |
|----------------------------|--|
| <b>Amount :</b>            | 40 µg  |
| <b>Purification :</b>      | Protein A chromatography   |
| <b>Content :</b>           | 0.5 mg/ml, lyophilized with PBS, pH 7.4, containing 0.02% sodium azide.  |
| <b>Storage condition :</b> | The antibody is stable in lyophilized form if stored at -20°C or below. The reconstituted antibody can be stored for 2-3 weeks at 2-8°C. For long term storage, aliquot and store at -20°C or below. Avoid repeated freezing and thawing cycles. |

### Application Note

ELISA detection: 0.01-0.1 µg/ml

Flow cytometry: 5-7 µg/ml

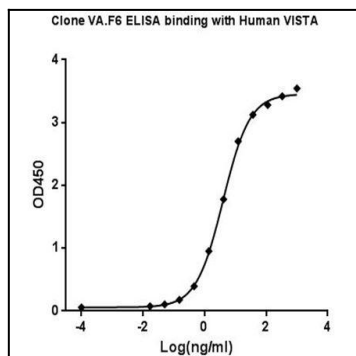

Figure-1 : ELISA binding of VISTA antibody (Clone: VA.F6) with Human VISTA recombinant protein, Coating antigen: VISTA-Fc at 1  $\mu\text{g/ml}$ , VISTA antibody dilution start from 1000 ng/ml,  $\text{EC}_{50}$ =3.953 ng/ml.

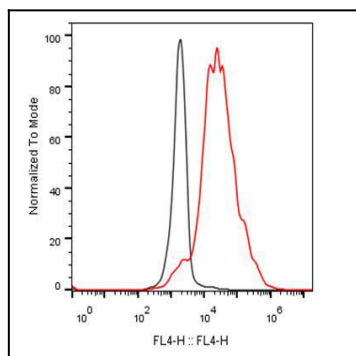

Figure-2 : Flow cytometric analysis of VISTA Antibody (Clone: VA.F6) on CHO-K1/VISTA stable cell line (Red histogram) at 5  $\mu\text{g/ml}$ ,  $2.5 \times 10^6$  cells/reaction. Black histogram represents CHO negative control cell. iFluor647 conjugated Goat Anti-Mouse IgG used as Secondary Antibody.
