

12-1201: Anti-Involucrin (Squamous Cell Terminal Differentiation Marker) Recombinant Rabbit Monoclonal Antibody (Clone:IVRN/2113R)

Clonality :	Monoclonal
Clone Name :	IVRN/2113R
Application :	IHC
Reactivity :	Human
Gene :	IVL
Gene ID :	3713
Uniprot ID :	P07476
Format :	Purified
Alternative Name :	IVL
Isotype :	Rabbit IgG
Immunogen Information :	Recombinant full-length human IVL protein

Description

It recognizes a protein of 66kDa-170kDa, identified as involucrin. In Western blotting of cultured human keratinocytes, this MAb reacts with a 120kDa protein. It stains the involucrin in a variety of sizes: 170kDa in MCF-7 cells, a doublet of ~115kDa and 150kDa in gorilla and owl monkey, 66kDa in dog, and a doublet of 105kDa in pig. Its epitope maps between codon 421-568 of human involucrin. Involucrin is expressed in a range of stratified squamous epithelia, including the cornea, which lacks a distinct cornified layer. In normal epidermis, it is first expressed in the upper spinous layers, and in keratinocyte cultures, all cells that have left the basal layer express it. Involucrin expression is altered in pathological conditions: in psoriasis and other benign epidermal hyperplasias, involucrin expression begins closer to the basal layer than normal; expression is abnormal in squamous cell carcinomas and premalignant lesions, and is reduced in severe dysplasias of the larynx and cervix.

Product Info

Amount :	20 µg / 100 µg
Purification :	Protein A/G
Content :	200µg/ml of recombinant MAb purified by Protein A/G. Prepared in 10mM PBS with 0.05% BSA & 0.05% azide. Also available WITHOUT BSA & azide at 1.0mg/ml.
Storage condition :	Antibody with azide - store at 2 to 8°C. Antibody without azide - store at -20 to -80°C. Antibody is stable for 24 months. Non-hazardous.

Application Note

Does not react with mouse.

Flow Cytometry (0.5-1Åµg/million cells); ,Immunofluorescence (1-2Åµg/ml); ,Immunohistology (Formalin-fixed) (0.1-0.2Åµg/ml for 30 min at RT),(Staining of formalin-fixed tissues is enhanced by digestion with trypsin or Protease XXV at 1mg/ml PBS for 5 min at 37Å°C),(Note than enzyme digestion is better than citrate buffer based epitope unmasking),Optimal dilution for a specific application should be determined.
