12-1113: Anti-CD43 (T-Cell Marker) Recombinant Mouse Monoclonal Antibody (Clone:rSPN/839)

Clonality: Monoclonal **Clone Name:** rSPN/839 Application: FACS.WB.IF.IHC

Reactivity: Human Gene: SPN Gene ID: 6693 **Uniprot ID:** P16150 Format: Purified

Galactoglycoprotein, GALGP, GPL115, Leukocyte sialoglycoprotein, Leukosialin, LSN, **Alternative Name:**

Sialophorin, SPN

Isotype: Mouse IgG1, kappa

Immunogen Information: Human full-length recombinant CD43 protein

Description

It recognizes a cell surface glycoprotein of 95/115/135kDa (depending upon the extent of glycosylation), identified as CD43 [Workshop IV]. Epitope of MAb Bra7G is clearly different from that of MAb rSPN/839, called "b" as opposed to "a" for rSPN/839. 70-90% of T-cell lymphomas and from 22-37% of B-cell lymphomas express CD43. No reactivity has been observed with reactive B-cells. So a B-lineage population that co-expresses CD43 is highly likely to be a malignant lymphoma, especially a low-grade lymphoma, rather than a reactive B-cell population. When CD43 antibody is used in combination with anti-CD20, effective immunophenotyping of the lymphomas in formalin-fixed tissues can be obtained. Costaining of a lymphoid infiltrate with anti-CD20 and anti-CD43 argues against a reactive process and favors a diagnosis of lymphoma.

Product Info

 $20 \mu g / 100 \mu g$ Amount: **Purification:** Protein A/G

200µg/ml of recombinant MAb purified by Protein A/G. Prepared in 10mM PBS with 0.05% BSA & Content:

0.05% azide. Also available WITHOUT BSA & azide at 1.0mg/ml.

Antibody with azide - store at 2 to 8°C. Antibody without azide - store at -20 to -80°C. Antibody Storage condition:

is stable for 24 months. Non-hazardous.

Application Note

(1-2̸µg/million cells);,Western Blot (1-2̸µg/ml);,Immunofluorescence Flow Cytometry (1-2Ã\\(\hat{A}\)pg/ml\);,Immunohistochemistry (Formalin-fixed) (1-2\(\hat{A}\)\(\hat{A}\)pg/ml for 30 minutes at RT\),(Staining of formalin-fixed tissues requires heating tissue sections in 10mM Tris with 1mM EDTA, pH 9.0, for 45 min at 95°C followed by cooling at RT for 20 minutes);
