

12-1266: Anti-von Willebrand Factor / Factor VIII Related-Ag (Endothelial Marker) Recombinant Rabbit Monoclonal Antibody (Clone:VWF/1859R)

Clonality :	Monoclonal
Clone Name :	VWF/1859R
Application :	WB,IHC
Reactivity :	Human
Gene :	VWF
Gene ID :	7450
Uniprot ID :	P04275
Format :	Purified
Alternative Name :	Coagulation Factor VIII, Factor VIII Related Antigen, F8VWF, von Willebrand Antigen 2, von Willebrand Disease (vWD)
Isotype :	Rabbit IgG
Immunogen Information : Recombinant fragment of human vWF protein (aa 1815-1939) (exact sequence is proprietary)	

Description

von Willebrand Factor (vWF) is a multimeric glycoprotein that is found in endothelial cells, plasma and platelets. It acts as a carrier protein for Factor VIII and promotes platelet adhesion and aggregation. vWF undergoes a variety of posttranslational modifications that influence the affinity and availability for Factor VIII, including cleavage of the propeptide and formation of N-terminal disulfide bonds. This antibody helps to establish the endothelial nature of some lesions of disputed histogenesis, e.g. Kaposi s sarcoma and cardiac myxoma. It is widely used for differentiating vascular lesions from those of other tissue differentiation within a panel of other vascular markers althoµgh not all tumors of endothelial differentiation contain this antigen.

Product Info

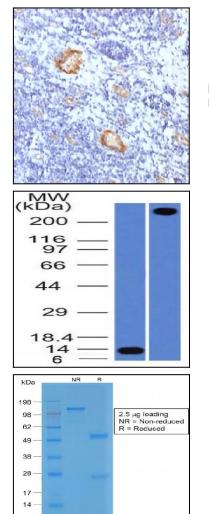

Amount :	20 µg / 100 µg
Purification :	Protein A/G
Content :	200μ g/ml of recombinant MAb purified by Protein A/G. Prepared in 10mM PBS with 0.05% BSA & 0.05% azide. Also available WITHOUT BSA & azide at 1.0mg/ml.
Storage condition :	Antibody with azide - store at 2 to 8°C. Antibody without azide - store at -20 to -80°C. Antibody is stable for 24 months. Non-hazardous.

Application Note

Western Blot (1-2Ã[µg/ml); Immunohistochemistry (Formalin-fixed) (1-2Ã[µg/ml for 30 minutes at RT) (Staining of formalin-fixed tissues requires heating tissue sections in 10mM Tris with 1mM EDTA, pH 9.0, for 45 min at 95°C followed by cooling at RT for 20 minutes);
