

## 44-1056: Anti-Nerve Growth Factor Receptor (NGFR) Monoclonal Antibody (Clone:IHC637)

<b>Clonality :</b>	Monoclonal
<b>Clone Name :</b>	IHC637
<b>Application :</b>	IHC
<b>Reactivity :</b>	Human
<b>Gene :</b>	NGFR
<b>Gene ID :</b>	4804
<b>Uniprot ID :</b>	P08138
<b>Format :</b>	Purified
<b>Alternative Name :</b>	NGFR,TNFRSF16
<b>Immunogen Information :</b>	Recombinant Human NGFR

### Description

Nerve Growth Factor Receptor (NGFR), also known as p75, P-75NTR or CD271, is a neurotrophin receptor belonging to the tumor necrosis factor receptor family. NGFR is expressed mainly in Schwann cells and neurons, as well as a number of other non-neuronal cell types, and functions during central and peripheral nervous system development to regulate neuronal growth, migration, differentiation, and cell death. Nerve Growth Factor Receptor is also expressed in melanocytes, melanomas, neuroblastomas, pheochromocytomas, neurofibromas, neurotized nevi (type C melanocytes), and other neural crest cell or tumor derivatives.

### Product Info

<b>Amount :</b>	0.1 ml / 0.5 ml
<b>Purification :</b>	Protein A/G Chromatography
<b>Content :</b>	Tris Buffer, pH 7.3 - 7.7, with 1% BSA and <0.1% Sodium Azide
<b>Storage condition :</b>	Store at 2°C - 8°C. Do not freeze.

### Application Note

Recommended dilutions: Immunohistochemical analysis: 1:100 - 1:200. However, this need to be optimized based on the research applications.
