

30-1970: FITC Conjugated, Anti-CD108 / Semaphorin 7a Monoclonal Antibody (Clone:MEM-150)

Clonality :	Monoclonal
Clone Name :	MEM-150
Application :	FACS
Reactivity :	Human
Conjugate :	FITC
Gene :	SEMA7A
Gene ID :	8482
Uniprot ID :	075326
Alternative Name :	SEMA7A,CD108,SEMAL
Isotype :	Mouse IgM
Immunogen Information :	HPB-ALL human T cell line

Description

CD108 (Sema7A) is a GPI-anchored semaphorin family member, which enhances central and peripheral axonal growth and is required for proper axon track formation during ebryogenesis. CD108 also regulates osteoclast differentiation and preosteoblastic cell migration, and in immune system affects cell proliferation, chemotaxis and cytokine release. On erythrocytes CD108 defines the JMH (John-Milton-Hagen) human blood group. CD108 signalizes through its receptors - plexin C1 and beta1 integrins.

Product Info

Amount :100 testsStorage condition :Store in the dark at 2-8°C. Do not freeze. Avoid prolonged exposure to light.
