

30-1646: Anti-CD11b Monoclonal Antibody (Clone:ICRF44)-Low Endotoxin

Clonality :	Monoclonal
Clone Name :	ICRF44
Application :	FACS, IP, IHC-Fr, ICC, Functional Assay
Reactivity :	Human, Non-Human Primates
Gene :	ITGAM
Gene ID :	3684
Uniprot ID :	P11215
Format :	Low Endotoxin
Alternative Name :	ITGAM,CD11B,CR3A
Isotype :	Mouse IgG1
Immunogen Information :	Rheumatoid synovial cells and human monocytes.

Description

CD11b (integrin alphaM subunit) is a 165-170 kDa type I transmembrane glycoprotein that non-covalently associates with integrin beta2 subunit (CD18); expression of the CD11b chain on the cell surface requires the presence of the CD18 antigen. CD11b/CD18 integrin (Mac-1, CR3) is highly expressed on NK cells, neutrophils, monocytes and less on macrophages. CD11b/CD18 integrin is implicated in various adhesive interactions of monocytes, macrophages and granulocytes, facilitating their diapedesis, as well as it mediates the uptake of complement coated particles, serving as a receptor for the iC3b fragment of the third complement component.

Product Info

Amount :	0.1 mg
Purification :	Purified by protein-A affinity chromatography
Storage condition :	Store at 2-8°C. Do not freeze.

Application Note

Flow Cytometry Immunoprecipitation Immunohistochemistry (frozen sections) Immunocytochemistry
Functional Application blocking of granulocyte activation
