

## 30-1761: Anti-CD11b / Mac-1 alpha Monoclonal Antibody (Clone:M1/70)-APC Conjugated

<b>Clonality :</b>	Monoclonal
<b>Clone Name :</b>	M1/70
<b>Application :</b>	FACS
<b>Reactivity :</b>	Human
<b>Conjugate :</b>	APC
<b>Gene :</b>	Itgam
<b>Uniprot ID :</b>	P05555
<b>Alternative Name :</b>	ITGAM,CD11B,CR3A
<b>Isotype :</b>	Rat IgG2b
<b>Immunogen Information :</b>	B10 mouse spleen cells enriched for T cells

### Description

CD11b (integrin alphaM subunit) is a 165-170 kDa type I transmembrane glycoprotein that non-covalently associates with integrin beta2 subunit (CD18); expression of the CD11b chain on the cell surface requires the presence of the CD18 antigen. CD11b/CD18 integrin (Mac-1, CR3) is highly expressed on NK cells, neutrophils, monocytes and less on macrophages. CD11b/CD18 integrin is implicated in various adhesive interactions of monocytes, macrophages and granulocytes, facilitating their diapedesis, as well as it mediates the uptake of complement coated particles, serving as a receptor for the iC3b fragment of the third complement component.

### Product Info

<b>Amount :</b>	0.1 mg
<b>Storage condition :</b>	Store in the dark at 2-8°C. Do not freeze. Avoid prolonged exposure to light.
