30-1662: Anti-CD120a / TNF receptor 1 Monoclonal Antibody (Clone:H398)-Low Endotoxin

Clonality: Monoclonal

Clone Name: H398

Application : FACS, IP, IHC, IHC-Fr, Functional Assay

Reactivity: Human
Gene: TNFRSF1A
Gene ID: 7132
Uniprot ID: P19438

Format: Low Endotoxin

Alternative Name: TNFRSF1A,TNFAR,TNFR1

Isotype: Mouse IgG2a

Immunogen Information: Recombinant full length human CD120a

Description

CD120a / TNF R1, also known as TNFR55 or TNFRSF1A, is a 55 kDa receptor for tumor necrosis factor alpha and it is expressed in most tissues. By binding its trimeric ligand the CD120a protein forms trimers and the conformation change leads to dissociation of the inhibitory factor SODD from its intracellular death domain and in formation of signaling platform. CD120a can mediate apoptosis, and function as a regulator of inflammation. Germline mutations of the extracellular domains of this receptor were found to be associated with the autosomal dominant periodic fever syndrome. The impaired receptor clearance is thought to be a mechanism of the disease.

Product Info

Amount: 0.1 mg

Purification : Purified by protein-A affinity chromatography

Storage condition : Store at 2-8°C. Do not freeze.

Application Note

Flow Cytometry Immunoprecipitation Immunohistochemistry Immunohistochemistry (frozen sections) Functional Application blocking
