30-2370: Anti-CD160 Monoclonal Antibody (Clone:BY55)-PE Conjugated

Clonality: Monoclonal

Clone Name: BY55 Application: **FACS** Reactivity: Human Conjugate: PΕ Gene: CD160 Gene ID: 11126 095971 **Uniprot ID:** CD160,BY55 **Alternative Name:** Isotype: Mouse IgM, kappa

Immunogen Information: Human NK cell line YT2C2

Description

CD160 is a cell surface glycoprotein of immunoglobulin superfamily, which functions as a costimulatory receptor expressed mainly on cytotoxic cell populations and recognizing both classical and non-classical MHC class I molecules. It can form disulfide-linked multimers. Down-modulation of CD160 occurs as a consequence of its proteolytic cleavage and the released soluble form was found to impair the MHC-class I specific cytotoxicity of CD8+ T lymphocytes and NK cells. In contrast to GPI-anchored isoform with broader expression among CD160 positive cells, expression of the transmembrane isoform is restricted to NK cells and is activation-dependent.

Product Info

Amount: 100 tests

Content: Stabilizing phosphate buffered saline (PBS), pH 7.4, 15 mM sodium azide **Storage condition:** Store in the dark at 2-8°C. Do not freeze. Avoid prolonged exposure to light.

Application Note

Flow cytometry: The reagent is designed for analysis of human blood cells using 10 μ l reagent / 100 μ l of whole blood or 106 cells in a suspension. The content of a vial (1 ml) is sufficient for 100 tests.
