## 30-1575: Anti-CD169 / Siglec-1 Monoclonal Antibody (Clone:7-239)

Clonality: Monoclonal Clone Name: 7-239

**Application :** FACS, IP, WB, IHC-Fr, Functional Assay

Reactivity: Human

Gene: SIGLEC1

Gene ID: 6614

Uniprot ID: Q9BZZ2

Format: Purified

Alternative Name: SIGLEC1,SN

Isotype: Mouse IgG1

Immunogen Information: human rhinovirus 14-infected monocyte-derived dendritic cells

## **Description**

CD169, also known as Siglec-1 or sialoadhesin, is a type I transmembrane glycoprotein of the sialic acid binding Ig-like lectin family. It binds to sialylated glycoproteins on various haematopoietic cells to mediate cell-cell interactions. CD169 is expressed on a subset of macrophages and dendritic cells. On CD14+ monocytes its expression can be induced by interferon alpha and gamma. High expression of CD169 is observed in the spleen, lymph nodes, bone marrow, and under inflammatory conditions rheumatoid arthritis and atherosclerosis, lower in the liver, lungs and gut. It has been shown to be involved in antigen presentation to invariant NKT cells, which play an important role in the innate arm of the immune system to modulate the subsequent acquired immune responses.

## **Product Info**

Amount: 0.1 mg

**Purification:** Purified by protein-A affinity chromatography

**Storage condition :** Store at 2-8°C. Do not freeze.

## **Application Note**

Flow Cytometry Immunoprecipitation Western Blotting Immunohistochemistry (frozen sections) Functional Application inhibition of erythrocyte rosetting with cells expressing cd169
