30-1824: Anti-CD169 / Siglec-1 Monoclonal Antibody (Clone:7-239)-APC Conjugated

Clonality: Monoclonal

Clone Name: 7-239

Application : FACS, IP, WB, IHC-Fr, Functional Assay

Reactivity: Human

Conjugate: APC

Gene: SIGLEC1

Gene ID: 6614

Uniprot ID: Q9BZZ2

Alternative Name: SIGLEC1,SN

Isotype: Mouse IgG1

Immunogen Information: human rhinovirus 14-infected monocyte-derived dendritic cells

Description

CD169, also known as Siglec-1 or sialoadhesin, is a type I transmembrane glycoprotein of the sialic acid binding Ig-like lectin family. It binds to sialylated glycoproteins on various haematopoietic cells to mediate cell-cell interactions. CD169 is expressed on a subset of macrophages and dendritic cells. On CD14+ monocytes its expression can be induced by interferon alpha and gamma. High expression of CD169 is observed in the spleen, lymph nodes, bone marrow, and under inflammatory conditions rheumatoid arthritis and atherosclerosis, lower in the liver, lungs and gut. It has been shown to be involved in antigen presentation to invariant NKT cells, which play an important role in the innate arm of the immune system to modulate the subsequent acquired immune responses.

Product Info

Amount: 100 tests

Storage condition: Store in the dark at 2-8°C. Do not freeze. Avoid prolonged exposure to light.
