30-1509: Anti-CD195 / CCR5 Monoclonal Antibody (Clone:T21/8)

Clonality: Monoclonal
Clone Name: T21/8
Application: FACS
Reactivity: Human
Gene: CCR5
Gene ID: 1234
Uniprot ID: P51681

Format: Purified

Alternative Name: CCR5,CMKBR5

Isotype: Mouse IgG1

Immunogen Information: CCR5 peptide (Met1-Lys22) KLH conjugate

Description

CD195 / CCR5 (also known as CKR-5) is a receptor for inflammatory CC-chemokines (characterized by a pair of adjacent cysteine residues), such as MIP-1 alpha, MIP-1 beta, or RANTES. It is a G protein-associated seven-pass transmembrane protein expressed on resting T cells with memory/effector phenotype, monocytes, macrophages and immature dendritic cells. This chemokine receptor regulates the activation and directed migration of leukocytes. Importantly, along with CD4, CD195 / CCR5 functions as a major receptor for HIV. Their ligand is the viral glycoprotein gp120.

Product Info

Amount: 0.1 mg

Purification: Purified by protein-A affinity chromatography

Storage condition : Store at 2-8°C. Do not freeze.

Application Note

Flow Cytometry Immunoprecipitation Western Blotting Application note:do not boil cell lysates prior to SDS-PAGE Immunocytochemistry ELISA
