

30-2052: Anti-CD26 Monoclonal Antibody (Clone:BA5b)-FITC Conjugated

Clonality :	Monoclonal
Clone Name :	BA5b
Application :	FACS
Reactivity :	Human
Conjugate :	FITC
Gene :	DPP4
Gene ID :	1803
Uniprot ID :	P27487
Alternative Name :	DPP4,ADCP2,CD26
Isotype :	Mouse IgG2a
Immunogen Information :	A human T cell clone

Description

CD26, also known as dipeptidyl peptidase IV (DPP-IV), is a homodimeric cell surface serine peptidase that degrades IFN-gamma-induced cytokines, acts as a T cell costimulatory molecule, and participates in multiple immunopathological roles in leukocyte homing and inflammation. Alterations in its peptidase activity are characteristic of malignant transformation. The enzymatic activity increases dramatically with tumour grade and severity. CD26 is expressed in various blood cell types, but also e.g. in cells that are histogenetically related to activated fibroblasts. Alterations in CD26 density have been reported on circulating monocytes and CD4+ T cells during rheumatoid arthritis and systemic lupus erythematosus.

Product Info

Amount :	100 tests
Storage condition :	Store in the dark at 2-8°C. Do not freeze. Avoid prolonged exposure to light.
