

30-1029: Anti-CD3 zeta/ CD247 Monoclonal Antibody (Clone:H146-968)-Azide free(Discontinued)

Clonality :	Monoclonal
Clone Name :	H146-968
Application :	WB
Reactivity :	Human
Gene :	CD247
Gene ID :	919
Uniprot ID :	P20963
Alternative Name :	CD247,CD3Z,T3Z,TCRZ,CD247,CD3 zeta
Isotype :	Hamster IgG
Immunogen Information :	Synthetic peptide corresponding to amino acids 151-164 of mouse CD3 zeta.

Description

CD3 complex is crucial in transducing antigen-recognition signals into the cytoplasm of T cells and in regulating the cell surface expression of the TCR complex. T cell activation through the antigen receptor (TCR) involves the cytoplasmic tails of the CD3 subunits CD3 gamma, CD3 delta, CD3 epsilon and CD3 zeta (CD247). These CD3 subunits are structurally related members of the immunoglobulins super family encoded by closely linked genes on human chromosome 11. The CD3 components have long cytoplasmic tails that associate with cytoplasmic signal transduction molecules. This association is mediated at least in part by a double tyrosine-based motif present in a single copy in the CD3 subunits. CD3 may play a role in TCR-induced growth arrest, cell survival and proliferation.

Product Info

Amount :	0.1 mg
Purification :	Purified by protein-A affinity chromatography
Storage condition :	Store at 2-8°C. Do not freeze.

Application Note

Western Blotting *Recommended dilution:* 1 µg/ml

Figure 1: Western blotting analysis of CD3 zeta (CD247) in lysate of murine splenocytes (reducing conditions) by the monoclonal antibody H146-968.
