

## 30-2069: Anti-CD314 Monoclonal Antibody (Clone:1D11)-FITC Conjugated

<b>Clonality :</b>	Monoclonal
<b>Clone Name :</b>	1D11
<b>Application :</b>	FACS, IP, IHC-Fr, Functional Assay
<b>Reactivity :</b>	Human
<b>Conjugate :</b>	FITC
<b>Gene :</b>	KLRK1
<b>Gene ID :</b>	22914
<b>Uniprot ID :</b>	P26718
<b>Alternative Name :</b>	KLRK1, D12S2489E, NKG2D
<b>Isotype :</b>	Mouse IgG1
<b>Immunogen Information :</b>	NKL cell line

### Description

CD314, also known as NKG2D (natural killer receptor G2D) or KLRK1 (killer cell lectin-like receptor subfamily K, member 1), is a homodimeric C-type lectin-like activating receptor and costimulator with type II membrane orientation (C terminus extracellular). CD314 homodimers are associated with DAP10, a membrane adaptor protein that signals similar to CD28 by recruitment of phosphatidylinositol 3-kinase. Engagement of CD314 amplifies antigen-specific T cell responses in CD314-positive T cell populations. In NK cells, CD314 is a primary activating receptor. As CD314 ligands the MHC class-I chain-related proteins A and B (MICA, MICB) and UL16-binding proteins (ULBPs) have been identified.

### Product Info

<b>Amount :</b>	100 tests
<b>Storage condition :</b>	Store in the dark at 2-8°C. Do not freeze. Avoid prolonged exposure to light.
