

30-2265: Anti-CD34 / Mucosialin Monoclonal Antibody (Clone:QBEnd-10)-PE Conjugated

Clonality :	Monoclonal
Clone Name :	QBEnd-10
Application :	FACS, IP, WB, IHC, IHC-Fr, Functional Assay
Reactivity :	Human, Non-Human Primates
Conjugate :	PE
Gene :	CD34
Gene ID :	947
Uniprot ID :	P28906
Alternative Name :	CD34
Isotype :	Mouse IgG1
Immunogen Information :	Human endothelial vesicles

Description

CD34 is a highly glycosylated monomeric 111-115 kDa surface protein, which is present on many stem cell populations. It is a well established stem cell marker, though its expression on human hematopoietic stem cells is reversible. CD34 probably serves as a surface receptor that undergoes receptor-mediated endocytosis and regulates adhesion, differentiation and proliferation of hematopoietic stem cells and other progenitors. CD34 expression is likely to represent a specific state of hematopoietic development that may have altered adhering properties with expanding and differentiating capabilities in both in vitro and in vivo conditions.

Product Info

Amount :	100 tests
Storage condition :	Store in the dark at 2-8°C. Do not freeze. Avoid prolonged exposure to light.

Figure 1: Cell surface staining of CD34 in human peripheral blood with anti-CD34 (QBEnd-10) PE.
