30-1286: Anti-CD41a Monoclonal Antibody (Clone:HIP8)

Clonality: Monoclonal

Clone Name: HIP8

Application: FACS, IHC-Fr

Reactivity: Human, Non-Human Primates

Format: Purified Isotype: Mouse IgG1

Description

CD41 (platelet glycoprotein IIb) is composed of two subunits (120 kDa a, alpha and 23 kDa b, beta) that interact with CD61 in the presence of calcium to form a functional adhesive protein receptor. Upon blood vessel damage, this receptor binds to a variety of proteins including von Willebrand factor, fibrinogen, fibronectin and vitronectin. CD41 is mainly expressed on megakaryocyte-platelet lineage, but generally belongs to the antigens that are expressed during early stages of hematopoietic differentiation.

Product Info

Amount: 0.1 mg

Purification : Purified by protein-A affinity chromatography

Storage condition : Store at 2-8°C. Do not freeze.

Application Note

Flow Cytometry This HIP8 antibody has been tested by flow cytometric analysis of human platelets. This can be used at less than or equal to $0.5~\tilde{\mathrm{A}}$ per $100~\tilde{\mathrm{A}}$ blood (per 10^6 cells). **Immunohistochemistry (frozen sections)**
