

## 30-1953: Anti-CD47 / Integrin Associated Protein Monoclonal Antibody (Clone:MEM-122)-FITC Conjugated

<b>Clonality :</b>	Monoclonal
<b>Clone Name :</b>	MEM-122
<b>Application :</b>	FACS, WB, IHC-Fr
<b>Reactivity :</b>	Non-Human Primates, Human, Pig
<b>Conjugate :</b>	FITC
<b>Gene :</b>	CD47
<b>Gene ID :</b>	961
<b>Uniprot ID :</b>	Q08722
<b>Alternative Name :</b>	CD47, MER6
<b>Isotype :</b>	Mouse IgM
<b>Immunogen Information :</b>	COS-7 (African green monkey) cells

### Description

CD47 (integrin-associated protein, IAP) is an ubiquitously expressed cell surface transmembrane glycoprotein interacting with several integrins and regulating their functions. Engagement of CD47 by soluble ligands or counter receptors modulates various signaling pathways, such as activation of heterotrimeric G proteins. Binding secreted thrombospondin-1, CD47 counteracts graft vascularization. CD47 acts also as a ligand for CD172a (signal regulatory protein alpha, SIRP alpha), an immune inhibitory receptor on macrophages; this interaction prevents phagocytosis of CD47-positive cells. Moreover, CD47-CD172a system affects cell migration, B cell adhesion and T cell activation. CD47 is also involved in modulation of chondrocyte responses to mechanical signals, and promotes neuronal development, being especially abundant in synapse-rich regions of brain and retina.

### Product Info

<b>Amount :</b>	100 tests
<b>Storage condition :</b>	Store in the dark at 2-8°C. Do not freeze. Avoid prolonged exposure to light.
