## 30-1883: Anti-CD54 / ICAM-1 Monoclonal Antibody (Clone:1H4)-Biotin Conjugated

Clonality: Monoclonal

Clone Name: 1H4

**Application:** FACS, WB, IHC, IHC-Fr, ICC

Reactivity: Human

Conjugate: Biotin

Gene: ICAM1

Gene ID: 3383

Uniprot ID: P05362

Alternative Name: ICAM1

Isotype: Mouse IgG2b

Immunogen Information: Raji cells and spleen cells fused with NS1 cells

## **Description**

CD54 (ICAM-1) is a 90 kD member of the C2 subset of immunoglobulin superfamily. It is a transmembrane molecule with 7 potential N-glycosylated sites, expressed on resting monocytes and endothelial cells and can be upregulated on many other cells, e.g. with lymphokines, on B- and T-lymphocytes, thymocytes, dendritic cells and also on keratinocytes, chondrocytes, as well as epithelial cells. CD54 mediates cell adhesion by binding to integrins CD11a/CD18 (LFA-1) and to CD11b/CD18 (Mac-1). The interaction of CD54 with LFA-1 enhances antigen-specific T-cell activation.

## **Product Info**

Amount: 0.1 mg

**Storage condition :** Store at 2-8°C. Do not freeze.

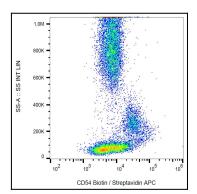

Figure 1: Expression of CD54 in normal human peripheral blood, as detected with anti-CD54 (1H4) biotin.
