

30-1311: Anti-CD62P / P-selectin Monoclonal Antibody (Clone:HI62P)

| | |
|--------------------------------|-----------------|
| Clonality : | Monoclonal |
| Clone Name : | HI62P |
| Application : | FACS, WB |
| Reactivity : | Human |
| Gene : | SELP |
| Gene ID : | 6403 |
| Uniprot ID : | P16109 |
| Format : | Purified |
| Alternative Name : | SELP,GMRP,GRMP |
| Isotype : | Mouse IgG1 |
| Immunogen Information : | Human platelets |

Description

CD62P (P-selectin) is an adhesion glycoprotein that is expressed on platelets and endothelial cells upon their activation. Interaction between CD62P and its mucin-like ligand PSGL-1 (P-selectin glycoprotein ligand-1) expressed on the microvilli of most leukocytes supports leukocyte rolling along postcapillary venules at the earliest time of inflammation. Both CD62P and PSGL-1 are extended glycoproteins that form homodimers. CD62P dimerization is probably mediated through interactions of the transmembrane domains and stabilizes leukocyte tethering and rolling, probably by increasing rebinding within a bond cluster.

Product Info

| | |
|----------------------------|---|
| Amount : | 0.1 mg |
| Purification : | Purified by protein-A affinity chromatography |
| Storage condition : | Store at 2-8°C. Do not freeze. |
