30-1960: Anti-CD71 / Transferrin Receptor Monoclonal Antibody (Clone:MEM-75)-FITC Conjugated

Clonality: Monoclonal **Clone Name:** MEM-75 FACS, IP, ICC Application: Reactivity: Human Conjugate: FITC Gene: **TFRC** Gene ID: 7037 **Uniprot ID:** P02786 **Alternative Name:** TFRC

Isotype: Mouse IgG1

Immunogen Information: NALM-6 human pre-B cell line

Description

CD71 (transferrin receptor) is a type II transmembrane glycoprotein expressed as homodimer in erythroid blood cell line and in activated leukocytes. Upon binding of holotransferrin (complex of transferrin and iron ions), CD71 is internalized by clathrin-mediated endocytosis. Acidification of endosomes by vesicular membrane proton pumps leads to dissociation of iron ions, whereas transferrin (apotransferrin) remains associated with CD71 and recycles to the cell surface, where it is released upon exposure to normal pH. CD71 is also involved in uptake of non-transferrin bound iron.

Product Info

Amount: 100 tests

Storage condition: Store in the dark at 2-8°C. Do not freeze. Avoid prolonged exposure to light.
