

## 30-1618: Anti-CD81 Monoclonal Antibody (Clone:M38)-Low Endotoxin

| Clonality :             | Monoclonal                     |
|-------------------------|--------------------------------|
| Clone Name :            | M38                            |
| Application :           | FACS                           |
| Reactivity :            | Human                          |
| Gene :                  | CD81                           |
| Gene ID :               | 975                            |
| Uniprot ID :            | P60033                         |
| Format :                | Low Endotoxin                  |
| Alternative Name :      | CD81,TAPA1,TSPAN28             |
| Isotype :               | Mouse IgG1                     |
| Immunogen Information : | MOLT-4 (human T-ALL cell line) |

#### Description

CD81 (TAPA-1), a member of the tetraspanin family, is expressed on virtually all nucleated cells, but above all on germinal center B cells. CD81 forms complexes with other tetraspanin proteins, integrins, coreceptors, MHC class I and II molecules, and influences adhesion, morphology, activation, proliferation and differentiation of B, T and other cells - e.g. in muscles CD81 promotes cell fusion and myotube maintenance. CD81 has been also identified as a receptor for the hepatitis C virus.

#### **Product Info**

| Amount :            | 0.1 mg  |
|---------------------|---|
| Purification :      | Purified by protein-A affinity chromatography |
| Storage condition : | Store at 2-8°C. Do not freeze.                |

### **Application Note**

Functional application: In human MOLT-4 T-cell line the antibody M38 inhibits syncytium formation induced by coculture with human T-cell leukemia virus type 1 (HTLV-1)-positive human T-cell lines. Flow cytometry: recommended dilution: 1 µg/ml. Western blotting: recommended dilution: 1-2 µg/ml; positive control: Jurkat cells, non-reducing conditions.

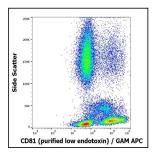

Figure-1: Flow cytometry surface staining pattern of human peripheral blood stained using anti-human CD81 (M38) purified antibody (low endotoxin, concentration in sample 4 11/4g/ml) GAM APC.

For Research Use Only. Not for use in diagnostic/therapeutics procedures.

Figure-2: Western blotting analysis of human CD81 using mouse monoclonal antibody M38 on lysate of Jurkat cell line under non-reducing conditions. Nitrocellulose membrane was probed with 2 µg/ml of mouse anti-human CD81 monoclonal antibody M38 followed by IRDye800-conjugated anti-mouse secondary antibody. A specific band was detected for CD81 at approximately 25 kDa.

Figure-3: Separation of human lymphocytes (red-filled) from neutrophil granulocytes (black-dashed) in flow cytometry analysis (surface staining) of human peripheral whole blood stained using anti-human CD81 (M38) purified antibody (low endotoxin, concentration in sample 4  $\hat{l}_{4}$ g/ml) GAM APC.
