30-1799: Anti-CD83 Monoclonal Antibody (Clone: HB15e)-APC Conjugated

Clone Name: Monoclonal

Clone Name: HB15e

Application: FACS, IHC-Fr

Reactivity: Human, Non-Human Primates

Conjugate: APC
Gene: CD83
Gene ID: 9308
Uniprot ID: Q01151
Alternative Name: CD83
Isotype: Mouse IgG1

Immunogen Information: Human CD83-transfected Cos cells

Description

CD83 is a 40-45 kDa heavily glycosylated type I cell surface glycoprotein of immunoglobulin family. It is expressed on the surface of mature dendritic cells, Langerhans cells in the skin, and interdigitating reticulum cells in the lymphoid tissues. Low expression of CD83 has been reported in activated T and B cells. Cytoplasmic expression of CD83 can be detected also in monocytes and macrophages. CD83 is involved in modulation of antigen presentation. Soluble CD83 has immunoregulatory functions, it is able to down-regulate dendritic cell maturation and stimulation of T cells. In the developing immune system, release of soluble CD83 from dendritic cells upon stimulation by gram-positive or gram-negative bacteria has anti-allergic effect. Herpes simplex virus, on the other hand, causes CD83 degradation in mature dendritic cells.

Product Info

Amount: 100 tests

Storage condition: Store in the dark at 2-8°C. Do not freeze. Avoid prolonged exposure to light.
