30-1063: Anti-CD89 Monoclonal Antibody (Clone:A59)

Clonality: Monoclonal

Clone Name: A59 Application: FACS

Reactivity: Human, Non-Human Primates

 Gene :
 FCAR

 Gene ID :
 2204

 Uniprot ID :
 P24071

 Format :
 Purified

Alternative Name: FCAR, CD89, IgA Fc receptor

Isotype: Mouse IgG1

Immunogen Information: Ag8.653 myeloma cells

Description

CD89 (Fc-alpha-R) is a type I transmembrane glycoprotein serving as a receptor for IgA. Soluble CD89 is detectable in serum and retains its IgA binding capacity. For signal transduction the association with FcR gamma chain homodimers is needed. CD89 is expressed on granulocytes, monocytes, macrophages, dendritic cells and myeloid cell lines. Its expression is upregulated in presence of IgA immune complexes, stimulators (such as LPS, PMA), TNF alpha, IL1 beta or GM-CSF, and it is downregulated in presence of TGF beta and suramin. Binding of IgA-opsonized targets to CD89 leads to phagocytic and cytotoxic processes of the immunologic defense.

Product Info

Amount: 0.1 mg

Purification : Purified by protein-A affinity chromatography

Storage condition : Store at 2-8°C. Do not freeze.
