

30-2339: PE Conjugated, Anti-Drebrin Monoclonal Antibody (Clone:DBN-N-03)

Clonality :	Monoclonal
Clone Name :	DBN-N-03
Application :	FACS
Reactivity :	Human
Conjugate :	PE
Gene :	DBN1
Gene ID :	1627
Uniprot ID :	Q16643
Alternative Name :	Developmentally-regulated brain protein
Isotype :	Mouse IgG2b
Immunogen Information :	Bacterially expressed N-terminal fragment of recombinant human drebrin (aa 1-326)

Description

Drebrin is an actin-binding protein, which is expressed mainly in neurons and plays important role in their morphogenesis. The highest level of its expression is in developing brain. Both in neurons and non-neuronal cells drebrin acts as a key regulator of actin cytoskeleton remodelling, affecting especially intercellular junctions, such as dendritic spines of neurons or the immune synapses of T cells. Decrease of drebrin amount in the brain seems to be associated with Alzheimer's disease and Down syndrome, and in case of B-cell precursor acute lymphoblastic leukemia (BCP-ALL) lower drebrin expression correlates with higher risk of relapse.

Product Info

Amount :	100 tests
Storage condition :	Store in the dark at 2-8°C. Do not freeze. Avoid prolonged exposure to light.

Figure 1: Intracellular staining of drebrin in NALM-6 cells using anti-drebrin (DBN-N-03) PE.
