30-1189: Anti-GAPDHS Monoclonal Antibody (Clone:Hs-8)

Clonality: Monoclonal

Clone Name: Hs-8

Application: WB, ICC, FACS
Reactivity: Human, Pig
Gene: GAPDHS
Gene ID: 26330
Uniprot ID: 014556
Format: Purified

Alternative Name: GAPDHS,GAPD2,GAPDH2,GAPDS,HSD-35,HSD35

Isotype: Mouse IgM

Freshly ejaculated human sperms were washed in PBS and extracted in 3% acetic acid, 10%

Immunogen Information: glycerol, 30 mM benzaminidine. The acid extract was dialyzed against 0.2% acetic acid and

subsequently used for immunization.

Description

GAPDHS (the sperm-specific glyceraldehyde phosphate dehydrogenase, also known as GAPD2, GAPDS, HSD-35, or GAPDH-2, is a glycolytic enzyme that plays an important role in carbohydrate metabolism. Like its somatic cell counterpart, this sperm-specific enzyme functions in a nicotinamide adenine dinucleotide-dependent manner to remove hydrogen and add phosphate to glyceraldehyde 3-phosphate to form 1,3-diphosphoglycerate. During spermiogenesis, this enzyme may play an important role in regulating the switch between different energy-producing pathways, and it is required for sperm motility and male fertility. It can be used as an intra-acrosomal marker for evaluation of the physiological state of sperm cells as well as for selection of a suitable method of fertilization in the laboratories of assisted reproduction.

Product Info

Amount: 0.1 mg

Purification : Purified by precipitation and chromatography

Storage condition : Store at 2-8°C. Do not freeze.

Application Note

Western Blotting Immunocytochemistry Recommended dilution:

Purified Antibody: 10 ̸µg/ml

Staining technique: Membrane permeabilization (acetone) is essential.

Flow Cytometry
