30-2385: PE Conjugated, Anti-Helios Monoclonal Antibody (Clone:22F6)

Clonality: Monoclonal

Clone Name: 22F6
Application: FACS
Reactivity: Human
Conjugate: PE
Gene: IKZF2
Gene ID: 22807
Uniprot ID: Q9UKS7

Alternative Name : IKZF2,HELIOS,ZNFN1A2

Isotype: Hamster IgG

Immunogen Information: Peptide coresponding to the amino acids 51-107 of Helios

Description

Helios, also known as IKZF2 (Ikaros family zinc finger protein 2) is a hematopoietic-specific transcription factor involved in the regulation of lymphocyte development, together with other members of this family, such as Aiolos and Ikaros. Helios forms homo- and heterodimers with these proteins and is thought to function predominantly in early hematopoietic development. Expression of Helios, Aiolos and Ikaros is restricted to cells of the hematopoietic system, whereas other family members, Eos and Pegassus, are more widely expressed. Helios is expressed at early stages of thymocyte development. In mature T cells, Helios has been strongly associated with Treg cells.

Product Info

Amount: 100 tests

Storage condition: Store in the dark at 2-8°C. Do not freeze. Avoid prolonged exposure to light.
