

30-2234: PE Conjugated Anti-HLA-DR1 (empty) Monoclonal Antibody (Clone:MEM-267)

Clonality :	Monoclonal
Clone Name :	MEM-267
Application :	WB
Reactivity :	Human
Conjugate :	PE
Gene :	HLA-DRB1
Gene ID :	3123
Uniprot ID :	P04229
Alternative Name :	HLA-DRB1
Isotype :	Mouse IgG2b
Immunogen Information :	Purified, insoluble DR1 beta chain (DRB1*0101) expressed in E. coli inclusion bodies.

Description

HLA-DR1 belongs to the HLA class II beta chain paralogues. The MHC Class II molecule is a heterodimer consisting of an alpha (DRA) and a beta chain (DRB), both anchored in the membrane. It plays a central role in the immune system by presenting peptides derived from extracellular proteins. MHC Class II molecules are expressed in antigen presenting cells (APC). The beta chain is approximately 26-28 kDa. Within the DR molecule the beta chain contains all the polymorphisms specifying the peptide binding specificities. Hundreds of DRB1 alleles have been described and typing for these polymorphisms is routinely done for bone marrow and kidney transplantation.

Product Info

Amount :	0.1 mg
Storage condition :	Store in the dark at 2-8°C. Do not freeze. Avoid prolonged exposure to light.
