30-1282: Anti-SLP65 / BLNK Polyclonal Antibody

Clonality: Polyclonal

Application: WB
Reactivity: Mouse
Gene: BLNK
Gene ID: 29760
Uniprot ID: Q8WV28
Format: Purified

B-cell adapter containing a SH2 domain protein, B-cell adapter containing a Src homology 2

Alternative Name: domain protein, Cytoplasmic adapter protein, Src homology 2 domain-containing leukocyte

protein of 65 kDa

Isotype: Rabbit IgG

Immunogen Information: A fusion protein representing amino acids 171-356 of human BLNK.

Description

SLP65 / BLNK (SH2 domain-containing leukocyte-specific phosphoprotein of 65 kDa; B cell linker protein), also known as BASH, is an adaptor protein that plays key role in B cell activation initiated by cross-linking the B cell receptor (BCR). Phosphorylated by Syk tyrosine kinase, SLP65 serves as a scaffold for Btk tyrosine kinase, Vav1 guanine nucleotide exchange factor, phospholipase C gamma2, as well as Grb2 and Nck adaptor proteins; thus represents a central linker protein that bridges the BCR-associated kinases with a multitude of signaling pathways.

Product Info

Amount: 0.1 mg

Purification : Purified from rabbit serum by precipitation methods

Storage condition : Store at 2-8°C. Do not freeze.

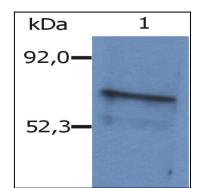

Figure 1: Western Blotting analysis (reducing conditions) of whole cell lysate of Sp2/0 mouse myeloma cell line using polyclonal anti-mouse SLP65 / BLNK antibody.
