

## 32-20136: Animal-Free Recombinant Murine G-CSF(Discontinued)

**Reactivity :** Mouse, Rat

**Alternative Name :** Granulocyte Colony-Stimulating, Factor, CSF-3, MGI-1G, GM-CSFBeta , pluripoietin

### Description

**Source:** **E.coli**G-CSF is a hematopoietic growth factor that stimulates the development of committed progenitor cells to neutrophils and enhances the functional activities of the mature end-cell. It is produced in response to specific stimulation by a variety of cells, including macrophages, fibroblasts, endothelial cells and bone marrow stroma. G-CSF is being used clinically to facilitate hematopoietic recovery after bone marrow transplantation. Human and murine G-CSF is cross-species reactive. Recombinant Murine G-CSF is a 19.0 kDa protein consisting of 179 amino acid residues.
