

32-20168: Recombinant Human HCC-1 (CCL14) (72 a.a.)(Discontinued)**Reactivity :** Human, Mouse**Alternative Name :** Hemofiltrate CC Chemokine-1, CCL14, HCC-1/HCC-3, NCC-2**Description**

Source: **E.coli** HCC-1 is a CC chemokine that signals through the CCR1 receptor and chemoattracts blood monocytes. It is secreted by various tissues, including skeletal muscle, heart, spleen, liver and bone marrow. Mature HCC-1 is found in four different forms, which are distinguished by differential N-terminal truncation and contain 74, 72, 71, or 66 amino acid residues. Recombinant Human HCC-1 is an 8.4 kDa protein consisting of 72 amino acids, including the four highly conserved residues present in CC chemokines.

Product Info**Amount :** 2 µg / 10 µg**Purification :** Purity: >= 98% by SDS-PAGE gel and HPLC analyses.**Content :** This recombinant protein is supplied in lyophilized form.**Amino Acid :** TESSRGPYH PSECCFTYTT YKIPRQRIMD YYETNSQCSK PGIVFITKRG HSVCTNPSDK WVQDYIKDMK
EN**Application Note**

Determined by its ability to chemoattract human monocytes using a concentration range of 5.0-20.0 ng/ml.
