

32-20347: Recombinant Murine IL-6(Discontinued)

Reactivity : Human, Mouse, Rat

Alternative Name : 26 kDa protein, IFN-b2, B cell differentiation factor (BCDF), BSF-2, HPGF, HSF, MGI-2

Description

Source: E.coli IL-6 is a pleiotropic cytokine that plays an important role in host defense by regulating immune and inflammatory responses. Produced by T cells, monocytes, fibroblasts, endothelial cells and keratinocytes, IL-6 has diverse biological functions. It stimulates B cell differentiation and antibody production, synergizes with IL-3 in megakaryocyte development and platelet production, induces expression of hepatic acute-phase proteins, and regulates bone metabolism. IL-6 signals through the IL-6 receptor system that consists of two chains, IL-6R Alpha and gp130. Murine IL-6 is inactive on human cells, while both human and murine are equally active on murine cells. Recombinant Murine IL-6 is a 21.7 kDa protein containing 188 amino acid residues.

Product Info

Amount : 2 µg / 10 µg

Purification : Purity: $\geq 98\%$ by SDS-PAGE gel and HPLC analyses.

Content : This recombinant protein is supplied in lyophilized form.

Amino Acid : MFPTSQVRRG DFTEDTPNR PVYTTQVGG LITHVLWEIV EMRKELCNGN SDCMNNDDAL AENNLKPEI
QRNDGCYQTG YNQEICLLKI SGLLEYHSY LEYMKNLKD NKKDKARVLQ RDTETLIHIF NQEVKDLHKI
VLPTPISNAL LDKLESQKE WLRTKTIQFI LKSLEEFKLV TLRSTRQT

Application Note

The ED_{50} as determined by the dose-dependent stimulation of the proliferation of IL-6-dependent murine 7TD1 cells is ≤ 0.02 ng/ml, corresponding to a specific activity of $\geq 5 \times 10^7$ units/mg.
