

32-20374: Recombinant Murine IL-15(Discontinued)

Reactivity : Human, Mouse, Rat Alternative Name : IL-T

Description

Source:E.coliIL-15 is an immunomodulating cytokine that stimulates the proliferation of T lymphocytes and shares many biological properties with IL-2. IL-15 exerts its biological activities primarily on T cells. It is also essential in the development, survival and activation of NK cells. Increased expression of IL-15 has been linked to rheumatoid arthritis, inflammatory bowel disease, and diseases affiliated with retroviruses HIV and HTLV-I. Human IL-15 is biologically active on mouse cells as measured by the dose-dependent stimulation of the proliferation of mouse CTLL cells. Recombinant Murine IL-15 is a 13.3 kDa protein consisting of 115 amino acid residues.

Product Info

 Amount :
 2 μg / 10 μg

 Purification :
 Purity: >= 98% by SDS-PAGE gel and HPLC analyses.

 Content :
 This recombinant protein is supplied in lyophilized form.

 Amino Acid :
 MNWIDVRYDL EKIESLIQSI HIDTTLYTDS DFHPSCKVTA MNCFLLELQV ILHEYSNMTL NETVRNVLYL ANSTLSSNKN VAESGCKECE ELEEKTFTEF LQSFIRIVQM FINTS

Application Note

The $ED_{50}\tilde{A}$ was determined by the stimulation of the proliferation of murine CTLL-2 cells is < 5.0 ng/ml, corresponding to a specific activity of > 2 x 10⁵ \tilde{A} which must be a specific a
