

32-20260: Recombinant Human KGF (FGF-7)(Discontinued)

Reactivity : Human, Leech, Mouse, Rat

Alternative Name : Keratinocyte Growth Factor, Fibroblast Growth Factor-7, HBGF-7

Description

Source:E.coli

KGF (FGF-7) is one of 23 known members of the FGF family. Proteins of this family play a central role during prenatal development, postnatal growth, and the regeneration of a variety of tissues, by promoting cellular proliferation and differentiation. KGF \hat{A} (FGF-7) is a mitogen factor specific for epithelial cells and keratinocytes. KGF \hat{A} (FGF-7) signals through FGFR 2b. KGF \hat{A} (FGF-7) plays a role in kidney and lung development, as well as in angiogenesis and wound healing. Recombinant Human KGF \hat{A} (FGF-7) is an 18.9 kDa protein consisting of 163 amino acid residues.

Product Info

Amount : 2 μ g / 10 μ g

Purification : Purity: \geq 95% by SDS-PAGE gel and HPLC analyses.

Content : This recombinant protein is supplied in lyophilized form.

Amino Acid : CNDMTPEQMA TNVNCSSPER HTRSYDMEG GDIRVRRLLFC RTQWYLRIK RGKVKGQTQM
KNNYNIMEIR TVAVGIVAIAK GVESEFYLAM NKEGKLYAKK ECNEDCNFKE LILENHYN TY ASAKWTHNGG
EMFVALNQKG IPVRGKKTCK EQKTAHFLPM AIT

Application Note

Determined by a cell proliferation assay using 4MBr-5 cells. The expected \hat{A} ED₅₀ \hat{A} for this effect is 0.1-15 ng/ml.
