32-20415: Recombinant Human Myostatin-Propeptide(Discontinued)

Reactivity: Mouse

Description

Source:E.coliMature myostatin is obtained by proteolytic processing of a biologically-inactive precursor protein, which contains an N-terminal propeptide of 243 amino acid residues. Myostatin-Propeptide exhibits high binding affinity for myostatin, and has been shown to be a potent inhibitor of myostatin. Over-expression of myostatin-propeptide in mice resulted in large increases (up to 200%) in skeletal muscle mass, similar to those observed in myostatin knockout mice. Recombinant Human Myostatin-Propeptide is a 27.8 kDa protein consisting of 244 amino acid residues.

Product Info

Amount : $5 \mu g / 25 \mu g$

Purification: Purity:>= 98% by SDS-PAGE gel and HPLC analyses. **Content:** This recombinant protein is supplied in lyophilized form.

Application Note

Determined by its ability to neutralize the Myostatin inhibitory effect of murine MPC-11 cells. The expected $\tilde{A} = \tilde{A} = \tilde{A$
